

Building and Construction in Chile

The Victorian Government recently commissioned Frank Advice International to undertake investigative work into the building and construction sector in Chile.

The aim of the report is to raise the profile of the Chilean market to Victoria's building and construction sector.

Together with the Chilean Consul General, the Aust. Chile Chamber of Commerce and the Australia-Latin American Business Council (ALABC) the following seminar has been developed to brief businesses on the outcomes of the report and encourage two way engagement with Chile and the region.

This seminar will also profile the practicalities of doing business in the region and provide opportunities to develop new networks for doing business in the region.

Tuesday 27 July 2010

11.00 – 2.00pm (light lunch will be served)
